Calispa

Preserve authenticity and quality, constantly evolving.

Rooted in the heart of Southern Italy, Calispa represents consolidated excellence in food production, where tradition, quality and industrial expertise come together to create authentic and recognizable products.

Founded in 1966 in Castel San Giorgio, in the province of Salerno, the company celebrates its 60-year history in 2026, marking six decades of experience in the Italian canning sector.

Specialized in the production of tomato sauces and legumes, Calispa has built a solid identity over time, based on the link with the territory, on the careful selection of raw materials and on a production approach oriented to excellence.

With two production plants located in Castel San Giorgio, the company combines the value of the Italian food tradition with constant technological evolution, investing in solutions capable of supporting high quality standards and large scale production.

The collaboration between Calispa and P.E. Labellers began with the first PackLab installations more than 20 years ago and continues today with P.E. technologies, confirming a relationship consolidated over time and in constant evolution.

P.E. Labellers and PackLab (division of P.E.) are both Product Brands of ProMach.

At Calispa, P.E. Labellers solutions label around 20 million glass containers each year. The machine manages front and back applications on three different glass bottle formats (350 ml, 500 ml and 720 ml), reaching speeds of up to 30,000 bottles per hour.

A result that demonstrates P.E. Labellers' ability to meet the needs of the food sector with efficient, flexible and high-performance labeling technologies.
