INTERVIEW

*Olearia Clemente*

**Olio Clemente. Truly good olive oil.**

**5 generations of olive oil passion:** 130 years of experience that have led to the production of special oils today, the result of a love for the product and respect for the territory of origin. On these solid foundations, Olearia Clemente has built its history and established its production philosophy.

**Olearia Clemente is located in Manfredonia (FG - Italy), in the heart of the Gargano, in Puglia. Founded in 1895, it is the largest company in the Italian Olive Oil Supply Chain and produces oils of absolute quality with outstanding organoleptic properties:** 100% Italian extra virgin olive oil, organic oil from the Gargano National Park, Dauno Gargano D.O.P., and flavored oils.

**Sustainability is pursued both in the field and within the company:** Olearia Clemente is fully aware of its role in contributing to the growth and development of the olive oil sector, and its technological choices regarding machinery and equipment follow the same direction.

The passion for quality and the drive for innovation brought Olearia Clemente and P.E. Labellers together in 1997, marking the beginning of a success story that continues to evolve every day.

Today, Clemente uses 5 P.E. Labellers machines to label 90 different formats, including glass, PET, and tin. Some containers have up to 5 different labels applied.

The exceptional flexibility in flawlessly applying various label combinations on such a high number of formats is an essential advantage that allows the company to optimize its production process and stand out in the market.
