INTERVIEW

Cantine di Verona

More than 50 years of experience at the service of consumers worldwide, aiming to bring to the table only the most excellent wines capable of celebrating the uniqueness of a territory, which is the thriving centre of the Italian winegrowing landscape: Verona and its marvellous lands, from Valpolicella to Lake Garda.

This is the mission passionately and devotedly pursued by Cantine di Verona every day, emerging as the embodiment of a place and global ambassador of a truly extraordinary land.

The group, made up of the three wineries: Cantine di Custoza, Valpantena and Colli Morenici, is today a lodestar for its 500-plus members but also its countless consumers worldwide. They produce over 30,000 kg of grapes, work 1,800 hectares of vineyards and bring all the main DOC wines from the Veronese territory to the market.

The group’s bottling lines make use of the best technology available on the market, operating within a production process based on standards of excellence.

The focus on quality, the need to rely on flexible and modular technology and the strive for innovation were the key elements that gave rise to the strong partnership between Cantine di Verona and P.E. Labellers, paving the way to a success story that began in 2010.

Right from the outset, the aim was to achieve absolute precision in the labelling of each bottle, diversifying the product families with numerous production lines and bringing impeccably dressed bottles to the shelves.
