INTERVIEW

In the Chamusca area, not far from the Portuguese capital Lisbon, lies the headquarters of Aguarela do Mundo.

The company is part of the Outeirinho Group, a Portuguese entity founded in 1992, which comprises 4 companies in Portugal and one in Spain.

Over the years, Outeirinho has managed to capture a significant share of the national market, thanks to partnerships with many of the main Portuguese chains. The Group's strategy is to be recognized as a leader in its sector through the quality of its products, services, and values. To this end, the company has been investing heavily in its facilities and production equipment since 1999, ensuring it always has the most modern technologies at its disposal.

Aguarela do Mundo was established in 2009 and has quickly grown to become a key player in the industry. Today, it boasts a modern headquarters equipped with the latest technologies and state-of-the-art equipment. This commitment to excellence is evident in every aspect of their operation, from production to packaging.

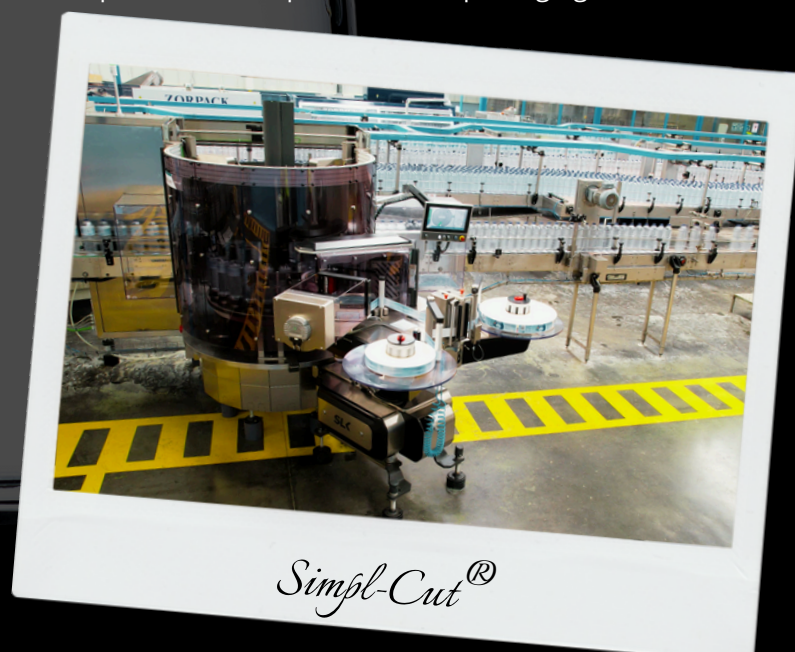

To meet the needs of its production and the demands of various clients it serves, Aguarela do Mundo has chosen Simpl-Cut®, the P.E. Labellers revolutionary labeling solution that reverses the traditional principles of Roll-fed machines.

We are proud to see Simpl-Cut® incorporated within the Outeirinho Group, which already boasts 9 P.E. solutions on their production lines, with more to be integrated soon.

This adoption is a proof to Aguarela do Mundo's dedication to staying at the forefront of technological advancements and their commitment to delivering the best possible products to their customers.
