INTERVIEW

Union Champagne, since 1966

Union Champagne was founded in **1966** from the desire to preserve the Champagne heritage and raise the quality of the wines produced through production techniques that aimed at innovation.

Today, **Union Champagne** is a recognised point of reference in France and in the world: it brings together 15 wine cooperatives in the best terroirs of Champagne, which include 2,500 members located on 1,420 hectares of land.

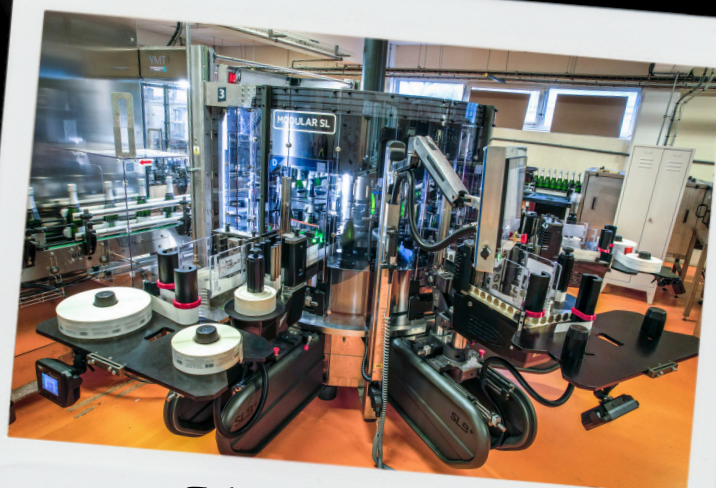

Union Champagne ranks first among Champagne cooperatives for the classification of its wines and third for its production. 90% of the wines produced belong to the Premier and Grand Cru categories.

Thanks to its efficient facilities and state-of-the-art production tools, Union Champagne guarantees wineries the provision of quality technical services and produces extremely elegant wines, for the great vintages of these houses.

The **passion for quality and the focus on innovation** brought together Union Champagne and P.E. Labellers, creating a success story that shows every day.

The iconic bottles of such fine wines require superior labelling, which can guarantee a **standard of excellence**, consistent with the product.

For their production line, Union Champagne chose a **Modular SL**, the flexible solution by P.E. Labellers.
