A passion for quality, from field to table.

Founded in 1991 in Błonie, Poland, Dawtona began its journey with the goal of bringing the best of nature to consumers' tables. Over the years, the company has grown into one of the leading names in the food industry, combining agricultural experience, modern production processes and a deep understanding of raw materials.

The connection with the land remains at the heart of Dawtona's philosophy. From carefully selected vegetables and ingredients to the final product, every stage of production is managed with attention and expertise to preserve authentic flavors and ensure consistent quality.

Today, the company offers a wide range of food products and continues to evolve while staying true to the values that have shaped its history: respect for nature, passion for food and commitment to excellence.

The passion for quality and the constant attention to every detail brought Dawtona and P.E. Labellers together, creating a partnership that has continued since 2005.

A collaboration that has strengthened over the years, resulting in the installation of 9 P.E. Labellers machines and reflecting Dawtona's continued trust in P.E. technologies and expertise.

Today, our solutions support the labeling of the company's metal containers, combining precision, reliability and efficiency to meet the demands of high-volume food production.
