INTERVIEW

Dulcop

The whole world in a bubble.

For over 80 years, Dulcop has been making the whole world play with the magic of soap bubbles. The Italian company is now one of the main international players in the sector, with a presence in more than 50 countries and an annual production of about 30 million pieces, with peaks of up to 600,000 containers per day.

Born as a product linked to the world of childhood, over time soap bubbles have been able to cross generations, becoming a shared experience even by adults, families and four-legged friends.

A timeless product, which Dulcop has been able to renew over time, expanding its range and diversifying its containers, while keeping its brilliant simplicity intact.

Founded in 1938 in the province of Bologna (IT), today Dulcop is in its third generation, leading the company with the same passion, innovating technologies, applications and product lines: soap bubbles, accessories and refills under the Bubble World brand, together with the most popular and trending cartoon characters.

A growth that is also reflected at the production level, where the variety of the offer requires increasingly flexible and adaptable solutions.

In this context, the partnership between Dulcop and PackLab, P.E. Labellers' division for linear labeling solutions with adhesive technology. Dulcop has identified PackLab as the right partner to accompany the evolution of the production line at a time of increasing diversification of the offer.

PackLab solutions apply with precision and great flexibility on 4 different formats, keeping quality standards constant and reaching up to 600,000 pieces per day.
